

QUALITY MEETS PRODUCTIVITY.

The first thing you'll notice about the P-4531i MFP or P-4536i MFP black and white multifunctional system is the large colour touch screen. It allows you to control all the system's functions at the touch of a screen, without wasting time studying a complex instruction manual. But the insides of the two multifunctional systems also have a lot to offer: high-speed printing, copying and scanning, a high print resolution of 1,200 x 1,200 dpi, and a high level of productivity and flexibility as well as being extremely environmentally friendly. All this, plus, it's quiet as a whisper. So good, it's practically unheard of!

HIGHLIGHTS:

Intuitive: The user-friendly aspects of the P-4531i MFP and P-4536i MFP aren't just limited to the adjustable (approximately 7 inch) touch screen panel; they are most noticeable in the standard HyPASTM interface for integrating optional customer-specific software solutions and applications. The optional Scan Extension Kit to automatically create text-searchable PDF files is yet another helpful feature. You can configure your system exactly as you need it.

Versatile: The systems offer a wide range of intelligent functions, including 'skip blank pages' or 'ID card copy' for copying double-sided originals in small formats that will subsequently be combined onto one page and printed. But that's not all: Mobile printing and scanning via the free Mobile Print app and printing via Apple AirPrint* or Wi-Fi* round off the package.

Productive: The first page starts after just 5.9 seconds, and the system prints and copies at a speed of 45 A4 pages per minute. Thanks to the large paper capacity of max. 2,600 sheets, it will be a long while before the P-4531i MFP and P-4536i MFP run out of steam! The system also boasts impressive performance, capable of scanning up to 60 images per minute.

Economical: Alongside all this functionality and productivity, the P-4531i MFP and P-4536i MFP also feature a smart design, whisper-quiet operation and a compact footprint design. The system even meets the strictest requirements in terms of energy efficiency – this is good for your budget, and the environment!
